

**Letter of Intent**

The Dutch Nuclear Pool (Atoompool) hereby declares that it is their intention to insure the nuclear liability and material damage for the future nuclear plant (Pallas reactor), which will be built at Petten, in the Netherlands. The insurance will go into force at the time that such an insurance is legally required.

This statement is without prejudice and based on the assumption that the Pallas Reactor will meet all the (future) legal requirements, the requirements made by the nuclear insurers and that the Atoompool will be able to underwrite such a risk in the future and depending on future international or national legislation on the insurance of nuclear liability.

Hans van der Wouden.

Manager Atoompool.
