

To whome it may concern:

Andelst, 26 February 2024

Bouwstoffen Unie contractually disposes the bottom ash and fly ash from the power plants Amer and Eemshaven.

In this process RWE Generation Holding B.V. is responsible counterparty which ensures that the offered the bottom ash and fly ash from the aforementioned power stations comply with the EU regulations/specifications on all aspects.

Based on this responsibility we assure you the following:

Referring to your exchange with the Authority for Nuclear Safety and Radiation Protection - Autoriteit Nucleaire Veiligheid en Stralingsbescherming (ANVS) in connection with the takeover and proper subsequent use of bottom ash and fly ash stored at the Amer power plant in Geertruidenberg, we hereby guarantee that this waste material, after proper blending on the power plant site, will exclusively be delivered to the utilization facility of TETRON Welbeck LLP in Nottinghamshire, UK and on this site will be properly processed to create a recovered suitable engineering material for soil and aggregate manufacture but not for concrete-based building construction.
